This list is dynamic and is revised as new data become available. New species are added to the list, and others are dropped from the list as appropriate. The list is generally published every two years. Further information may be obtained by contacting the North Carolina Natural Heritage Program, Department of Natural and Cultural Resources, 1651 MSC, Raleigh, NC 27699-1651. Additional information on rare species, as well as a digital version of this list, can be obtained from the Natural Heritage Program's website at www.ncnhp.org.

Acknowledgements

The North Carolina Natural Heritage Program List of Rare Plant Species of North Carolina was originally compiled and published by Alan Weakley in 1991. It has been revised and updated over the years by Program Botanists Alan Weakley, Jame Amoroso, Misty Franklin, Laura Gadd Robinson, Brenda L. Wichmann, and Andy Walker. Special thanks are given to Misty Franklin, Wesley Knapp, Richard LeBlond, Michael Lee, Harry LeGrand, Suzanne Mason, Linda Rudd, Michael Schafale, Bruce Sorrie, and Alan Weakley for their involvement in the development of the list; to Jame Amoroso, Blanka Aguero, and Paul Davison for assistance with the bryophyte lists; to Gary Perlmutter and Scott LeGreca for assistance with the lichen list; and to NCNHP staff Jame Amoroso, Garrett Billings, Merry Conlin, Kayla Christianson, Dani Davis, Melanie Flood, Misty Franklin, Laurie Hamon, Stephanie Horton, Kat Johnson, Suzanne Mason, Scott Pohlman, Judy Ratcliffe, Mike Schafale, Jess Schaner, Nathan Shepard, David Siripoonsup, Vanessa Voelker, and Dakota Wagner.

The list of people who have assisted in the preparation of the vascular plant list, provided information to the NCNHP on rare species occurrences, or otherwise contributed to our understanding of the rare flora of the state are too many to mention, but a partial list of recent contributors includes: Aster Ayer, Emily Babb, Rex Badgett, Justin Bashaw, Tim Bassett, Moni Bates, Will Bennett, Max Bisaha, Brian Bockhahn, Jay Bolin, Ellis Borsarge, Forbes Boyle, Ben Brewer, Matt Bushman, Kevin Caldwell, Owen Carson, Larry Chen, Christian Cline, Crystal Cockman, Becca Cohler, Ed Corey, Csilla Czako, Becky Dill, Brandi Driggers, David DuMond, Maria Dunlavey, Bryan England, Matt Estep, Tracy Feldman, Don Fisher, Sue Fruchey, Brandon Fuller, John Fussell, Tal Galton, Park Greer, Dave Gregory, Steve Hall, Matt Haney, Gary Haught, Nikolai Hay, Michelle Henson, Sunny Himes, Stacy Huskins, Alicia Jackson, Steph Jeffries, Andrew Jenkins, Emma Jonas, Archer Jones, Chase Joyner, Gary Kauffman, Josh Kelly, Cheryl Knepp, Jay Kranyik, Sarah Krementz, Alexander Krings, Mike Kunz, Lenny Lampel, Ron Lance, Richard LeBlond, Harry LeGrand, Byron Levan, Kate Loughran, Solea Lubinski-Shippert, Jeff Marcus, Mike Martin, Carol Ann McCormick, Patrick McMillan, Ashley Morrison, William Moye, Torry Nergart, Alison Northup, Hanne Parks, Bob Peet, Gerald Pottern, Julia Prins, Ben Pugh, Milo Pyne, Lloyd Raleigh, Evan Raskin, Andrew Renfro, Annkatrin Rose, Peter Schafran, Ed Schwartzman, Marietta Shattelroe, Alan Smith, Becky Smucker, Bruce Sorrie, Joe Stockert, Dale Suiter, Sarah Toner, Julie Tuttle, Chris Ulrey, Eric Ungberg, Cason Verhine, Andy Walker, Virginia Ward, Allison Schwarz Weakley, Armin Weise, Zach West, Brandon Wheeler, Haven Wiley, Julian Wilson, Margaret Woodbridge, Chad Wunderlich, Loy Xingwen, and contributors to the Rare Vascular Plants of North Carolina iNaturalist Project.

We sincerely appreciate each of the collaborators, volunteers, and landowners who provide data to North Carolina's Natural Heritage Program.

INTRODUCTION

The North Carolina Natural Heritage Program (NCNHP) conducts and maintains an inventory of known locations of rare animals and plants in the state as part of its mission to support conservation of natural areas. The primary functions of this inventory list are its use 1) in determining priorities for protection of the state's most important natural areas and the animals and plants contained therein, 2) in determining priorities for inventory, and 3) by public agencies, conservation organizations, and private persons for environmental assessment and land management planning.

The North Carolina Natural Heritage Program is charged under the Nature Preserves Act (G.S. 143B-135.250 - 143B-135.272) to compile and maintain data and information relevant to the protection of North Carolina's most important natural areas. The Program takes the lead role in the inventory and assessment of the state's natural diversity and the identification of important natural areas and rare species habitats. The list incorporates the most recent federal status designations determined by the U.S. Fish and Wildlife Service (USFWS) for plant taxa native to North Carolina. This list also includes North Carolina legal status information from the N.C. Plant Conservation Program (NCPCP). NCPCP is responsible for the listing and protection of the state's plants, under NC General Statutes Chapter 106 Article 19B 106-202.12. The NCNHP, NCPCP, and USFWS work cooperatively to ensure the continued survival of all of North Carolina's rich flora.

The rare plants in North Carolina are monitored (or tracked) in the Natural Heritage database. The Program tracks approximately 950 plants including vascular plants, bryophytes (mosses, liverworts, hornworts), and lichenized fungi. For all tracked species, we conduct conservation status assessments following NatureServe methodology, and map standardized occurrences in the NatureServe Biotics data management system, which includes maps and tabular data.

Status and Rank

The North Carolina Natural Heritage Program (NCNHP) maintains information on the legal status (federal and/or state) for all rare plants in North Carolina. A state rank is also determined and maintained for all plants known to occur in the state.
Many species that lack formal federal or state legal protection are nonetheless rare or uncommon in North Carolina. To convey information about the rarity of these plants within the state, NCNHP provides status designations that fall into two categories: Significantly Rare (SR) or Watch List (W). The North Carolina Status codes and definitions are provided in the Explanation of Status and Rank Codes document.

List Format

The Natural Heritage Program List of Rare Plant Species of North Carolina is available in both document and spreadsheet formats. The document lists species organized by five major taxonomic groups: Vascular Plant, Moss, Liverwort, Hornwort, and Lichen. Within a given group, species are listed alphabetically by scientific name. A common name is provided as well as the status and rank for each taxon. The supplementary spreadsheet allows for sorting and filtering and provides additional information on the geographical distribution and habitat for each taxon. To learn more about the information provided in the list please review the Explanation of Status and Rank Codes document.

Taxonomy

Taxonomic Group: Each taxon is categorized into one of five major groups: Vascular Plant, Moss, Liverwort, Hornwort, and Lichen.

Scientific Name: The binomial or trinomial taxon name is provided. Scientific authorities for names have been omitted to save space. Scientific names are standardized to follow the taxon concepts and nomenclature used by the following standard references:

- Vascular Plants (dicots, monocots, gymnosperms, ferns, and fern allies): Weakley, A.S., and Southeastern Flora Team. 2026. Flora of the southeastern United States Web App. University of North Carolina Herbarium, North Carolina Botanical Garden, Chapel Hill, U.S.A. fsus.ncbg.unc.edu.

- Lichens: Perlmutter, G. and T. Howard. 2026. Lichens of North Carolina [Internet]. Raleigh (NC): North Carolina Biodiversity Project and North Carolina State Parks. Available from https://auth1.dpr.ncparks.gov/lichen/index.php.

- Bryophytes (mosses, liverworts, hornworts): Amoroso, J.L., B. Aguero, D. DuMond, and T. Howard. 2026. The Bryophytes of North Carolina [Internet]. Raleigh (NC): North Carolina Biodiversity Project and North Carolina State Parks. Available from https://auth1.dpr.ncparks.gov/bryophytes/index.php.

Common Name: Common names are not standardized and do not follow a particular concept or flora.

NC Natural Heritage Inventory

The Program maintains and continues to build the Natural Heritage inventory for the state of North Carolina. This inventory is the single most comprehensive compilation of records documenting the location and ecological status of rare plant species in the state. Staff ecologists, botanists, and zoologists, and cooperating agencies conduct the ongoing research and field surveys to generate information for the inventory. Data and information are also supplied by an extensive network of botanical professionals and volunteer citizen scientists. We derive records from historical reports, herbarium specimens, agency records, iNaturalist, in addition to precise reports and maps of field observations.

Contribute Data

NCNHP requests locality and population information for the species listed in the Natural Heritage Program List of Rare Plant Species of North Carolina as well as those species designated as Watch List. If you would like to provide observations, data and information please complete a NCNHP Plant Survey Form at https://www.ncnhp.org/share-data. You may also contribute data via iNaturalist. Please visit the Rare Vascular Plants of North Carolina Project on iNaturalist and read the journal posts to learn more about how to join the project.

EXPLANATION OF STATUS AND RANK CODES

North Carolina Natural Heritage Program List of Rare Plant Species of North Carolina

STATUS

The N.C. Natural Heritage Program (NCNHP) works cooperatively with the U.S. Fish and Wildlife Service (USFWS) and the N.C. Plant Conservation Program (NCPCP) to ensure the continued survival of all of North Carolina's rich flora. The advice of these agencies' scientific councils and committees as well as legal protection designations have been considered in the creation of **North Carolina Natural Heritage Program List of Rare Plant Species of North Carolina**. This list incorporates the most recent federal status designations for all plants native to North Carolina and the current state status designation for plants on the state Protected Plant Species List.

Many species that lack formal state or federal legal protection are nonetheless rare in North Carolina. To convey information about the rarity of these plants within the state, the N.C. Natural Heritage Program provides status designations that fall into two categories: Significantly Rare (SR) or Watch List (W). The Program collects data on these species in addition to those with a legal protection status.

Federal Legal Status

Definitions are derived from U.S. Endangered Species Act of 1973, Sec. 3 (USESA). For the purposes of the USESA, Congress defined species to include subspecies and varieties. For official definitions and lists of protected species, consult the U.S. Fish and Wildlife Service (USFWS).

E = Endangered: any species in danger of extinction throughout all or a significant portion of its range.

T = Threatened: any species likely to become Endangered within the foreseeable future throughout all or a significant portion of its range.

State Legal Status

Legal definitions are derived from N.C. Plant Protection and Conservation Act (NC General Statutes Chapter 106 Article 19B 106-202.12). For official definitions and lists of protected species, please consult the North Carolina Plant Conservation Program.

E = Endangered: any species or higher taxon of plant whose continued existence as a viable component of the State's flora is determined to be in jeopardy by the NC Plant Conservation Program Board; also, any species of plant determined to be an "endangered species" pursuant to the Federal Endangered Species Act.

T = Threatened: any resident species of plant which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range, or one that is designated as threatened by the Federal Fish and Wildlife Service.

SC-V = Special Concern-Vulnerable: any species or higher taxon of plant in North Carolina which requires monitoring, but which may be collected and sold under the provisions of the NC Plant Protection and Conservation Act and is likely to become a threatened species within the foreseeable future (02 NCAC 48F .0401).

SC-H = Special Concern – Historical: any species or higher taxon of plant in North Carolina which requires monitoring, but which may be collected and sold under the provisions of the NC Plant Protection and Conservation Act and occurred in North Carolina at one time, but for which all known populations are currently considered to be either historical or extirpated (02 NCAC 48F .0401).

State Natural Heritage Status – Significantly Rare

Significantly Rare is a NCNHP designation. Any plant species which has not been listed by the U.S. Fish and Wildlife Service as Endangered, Threatened, or Candidate or by the N.C. Plant Conservation Program as an Endangered, Threatened, or Special Concern species, but which exists in the state (or once occurred in the state) in small numbers (generally fewer than 100 populations) and has been determined by the NCNHP to need **monitoring and tracking**. Significantly Rare species include species of historical occurrence with some likelihood of rediscovery in the state and species substantially reduced in numbers by habitat destruction, direct exploitation, or disease. Species considered extirpated in the state, with little likelihood of rediscovery, are given no N.C. status (unless already listed by the NC Plant Conservation Program as E, T, or SC).

SR-L = Significantly Rare–Limited: the range of the species is **limited** to North Carolina and adjacent states (endemic or near endemic). These species may have relatively few populations in North Carolina and range wide. The preponderance of their distribution is in North Carolina and their fate depends largely on conservation here.

SR-T = **Significantly Rare–Throughout:** the species is rare **throughout** its range with relatively few populations range wide.

SR-D = SR-Disjunct: the species is disjunct to North Carolina from a main range in a different part of the country or world.

SR-P = SR-Peripheral: the species is at the **periphery** of its range in North Carolina. These species are generally more common elsewhere, occurring in North Carolina at the edge of their main ranges, often in habitats that are unusual in North Carolina.

SR-O = Significantly Rare-Other: the range of the species is sporadic or cannot be described by the other Significantly Rare categories.

State Natural Heritage Status – Watchlist

Watchlist is a NCNHP designation. The watchlist includes taxa of potential conservation concern that are rare or uncommon, are not well studied, or are otherwise threatened with serious decline but are not currently legally protected or designated as Significantly Rare.

W-RS (formerly W1) = Rare but Relatively Secure: Species whose status in N.C. is relatively well known and appear to be relatively secure at this time. While still notably rare, these species do not currently require site-specific monitoring and so are not on the Rare List. Many of these species were formerly on the Rare List; they are retained in this category because they require a lower level of monitoring to ensure their long-term security.

W-QT (formerly W2) = Rare but Questionable Taxonomy: Species that include taxa of dubious validity and taxa under study. If further study reveals that these are valid taxa, they would warrant addition to the Rare List. This category has been used for named and unnamed taxa that currently appear likely to achieve recognition by accepted taxonomic authorities.

W-QD (formerly W3) = Rare but Questionable Documentation: Species that have been reported from N.C. without adequate documentation. These species should be listed at a higher level when their reported occurrence in N.C. is verified. This category includes sight records, old and vague reports for which no documentation has appeared, and, in a few cases, more recent literature reports for which we have not yet received documentation.

W-NN (formerly W4) = Rare but Believed Not Native: Species known to occur in N.C. that current data suggest are not native to N.C. but whose native occurrence is plausible. Some of these species were previously listed at a higher level, but field investigations suggest that all known N.C. occurrences are introductions.

W-PD (formerly W5) = Population Decline in NC: Species that are known to be declining in North Carolina for reasons beyond habitat loss. The distribution or population sizes of such species in the state are relatively well-known. Reasons for decline include exotic pests or pathogens, overcollection, poaching, and failure of reproduction. Because many of these taxa were once abundant or even dominant in parts of N.C., they may still be fairly common or frequently encountered, despite the strong decline. If current trends continue, however, many of these species will be threatened with extirpation in all or a major part of their ranges in N.C.

W-PK (formerly W7) = Poorly Known in NC: Species with inadequate information about their distribution and rarity in N.C. These are generally species which appear to be rare based on museum records and field experience of NCNHP staff, consultants, and cooperating scientists. Further information is needed to determine the true status of these species in N.C.

NUMBER OF PLANT TAXA IN NORTH CAROLINA BY STATUS

The table below indicates the number of taxa tracked in each taxonomic group and status category. Because some taxa have both a North Carolina (NC) and a United States (US) status, totals cannot be added across complete rows. The total number of taxa in North Carolina is an estimate of the taxa that currently or historically occurred in the state.

Group	Approximate number in NC	NC-E	NC-T	NC-SC	NC-SR	NC-W	US-E	US-T
Vascular Plants	4306	180	172	121	273	467	16	10
Mosses	265	1	0	1	118	73	0	0
Liverworts	113	0	0	2	57	26	0	0
Hornworts	5	0	0	0	1	3	0	0
Lichens	256	2	8	3	23	28	1	0
Total	**4945**	**183**	**180**	**127**	**472**	**597**	**17**	**10**

RANK

Using a ranking system developed by NatureServe and the Natural Heritage Program Network, the North Carolina Natural Heritage Program (NCNHP) provides two ranks for each element. The global rank is based on an element's worldwide imperilment and is designated by state Natural Heritage Programs working in coordination with NatureServe; the state rank is based on the imperilment of the element in North Carolina and is designated by the NCNHP. Element ranks are based on many factors, the most important ones being estimated number of Element Occurrences (EOs), estimated abundance (number of individuals), geographic range, relative threat of destruction, and ecological fragility.

State Rank

State ranks are designated by the North Carolina Natural Heritage Program (NCNHP), following methodology and guidance from NatureServe. This approach allows for consistency among many programs and across state lines. The definitions provided below follow the NatureServe Subnational Conservation Status Definitions published by NatureServe.

S1 = Critically Imperiled —At very high risk of extirpation in North Carolina due to very restricted range, very few populations or occurrences, very steep declines, severe threats, or other factors.

S2 = Imperiled —At high risk of extirpation in North Carolina due to restricted range, few populations or occurrences, steep declines, severe threats, or other factors.

S3 = Vulnerable — At moderate risk of extirpation in North Carolina due to a fairly restricted range, relatively few populations or occurrences, recent and widespread declines, threats, or other factors.

S4 = Apparently Secure — At a fairly low risk of extirpation in North Carolina due to an extensive range and/or many populations or occurrences, but with possible cause for some concern as a result of local recent declines, threats, or other factors.

S5 = Secure — At very low or no risk of extirpation in North Carolina due to a very extensive range, abundant populations or occurrences, with little to no concern from declines or threats.

SH = Possibly Extirpated – Known from only historical records but still some hope of rediscovery. There is evidence that the species may no longer be present in North Carolina, but not enough to state this with certainty. Examples of such evidence include (1) that a species has not been documented in approximately 20-40 years despite some searching and/or some evidence of significant habitat loss or degradation; (2) that a species or ecosystem has been searched for unsuccessfully, but not thoroughly enough to presume that it is no longer present in the jurisdiction.

SX = Presumed Extirpated—Species or ecosystem is believed to be extirpated from North Carolina. Not located despite intensive searches of historical sites and other appropriate habitat, and virtually no likelihood that it will be rediscovered.

SU = Unrankable — Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.

SNA = Not Applicable — A conservation status rank is not applicable because the species or ecosystem is not a suitable target for conservation activities (e.g., long distance aerial and aquatic migrants, hybrids without conservation value, and non-native species or ecosystems.

S#S# = Range Rank —A numeric range rank (e.g., S2S3 or S1S3) is used to indicate any range of uncertainty about the status of the species or ecosystem.

S#? = Inexact Numeric Rank —Denotes inexact numeric rank.

Global Rank

Global ranks are designated by NatureServe and are provided by the North Carolina Natural Heritage Program (NCNHP) for information only. For the most current global ranks, please consult the NatureServe Explorer. The definitions provided below follow the Definitions of NatureServe Global Conservation Status Definitions.

G1 = **Critically Imperiled** — At very high risk of extinction or elimination due to very restricted range, very few populations or occurrences, very steep declines, very severe threats, or other factors.

G2 = **Imperiled** — At high risk of extinction or elimination due to restricted range, few populations or occurrences, steep declines, severe threats, or other factors.

G3 = **Vulnerable** — At moderate risk of extinction or elimination due to a fairly restricted range, relatively few populations or occurrences, recent and widespread declines, threats, or other factors.

G4 = **Apparently Secure** — At fairly low risk of extinction or elimination due to an extensive range and/or many populations or occurrences, but with possible cause for some concern as a result of local recent declines, threats, or other factors.

G5 = **Secure** — At very low risk of extinction or elimination due to a very extensive range, abundant populations or occurrences, and little to no concern from declines or threats.

GH = **Possibly Extinct** — Known from only historical occurrences but still some hope of rediscovery. Examples of evidence include (1) that a species has not been documented in approximately 20-40 years despite some searching and/or some evidence of significant habitat loss or degradation; (2) that a species or ecosystem has been searched for unsuccessfully, but not thoroughly enough to presume that it is extinct or eliminated throughout its range.

GX **= Presumed Extinct** — Not located despite intensive searches and virtually no likelihood of rediscovery.

GU = **Unrankable** — Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.

GNA **= Not Applicable** — A conservation status rank is not applicable because the species or ecosystem is not a suitable target for conservation activities. A global conservation status rank may be not applicable for several reasons. Typically, the species is a hybrid without conservation value, or of domestic origin.

G#G# = **Range Rank** — A numeric range rank (e.g., G2G3, G1G3) is used to indicate uncertainty about the exact imperilment of a taxon or ecosystem type.

G#? **= Inexact Numeric Rank** - Denotes inexact numeric rank.

G#T# **= Infraspecific Taxon (trinomial) -** The status of infraspecific taxa (subspecies or varieties) are indicated by a "T-rank" following the species' global rank. T-ranks follow the same principles outlined above. For example, the global rank of a critically imperiled subspecies of an otherwise widespread and common species would be G5T1..

GNR **= Unranked** — Global rank not yet assessed.

G#Q **= Questionable taxonomy that may reduce conservation priority** - Distinctiveness of this entity as a taxon is questionable; resolution of this uncertainty may result in change from a species to a subspecies or hybrid, or inclusion of this taxon or type in another taxon or type, with the resulting taxon having a lower-priority (numerically higher) conservation status rank.

Geographical Distribution and Habitat (information in supplementary spreadsheet)

Habitat Comment – The physiognomic provinces or geographical region in which each taxon is known to occur is indicated using the symbology described below, followed by known habitat. This information should not be regarded as the only province(s) or regions(s) of the state in which the species could occur; our knowledge of the flora of North Carolina is still very imperfect.

M-Mountains: All parts of North Carolina west of the foot of the Blue Ridge Escarpment.

P-Piedmont: All parts of North Carolina east of the foot of the Blue Ridge Escarpment and west of the Fall Line, including outlying "foothill" ranges, such as the Brushy, Uwharrie, Sauratown, and South mountains. This province is shallowly underlain by crystalline metamorphic, igneous, or (rarely) consolidated sedimentary rocks

S-Sandhills: Portions of Cumberland, Harnett, Hoke, Lee, Moore, Richmond, Scotland, and Montgomery counties consisting mostly of deep aeolian sands of the Middendorf and Pinehurst formations (Cretaceous to Tertiary age). The Sandhills are really part of the coastal plain but are here distinguished because of their distinctive geomorphology and vegetation. Areas somewhat resembling the Sandhills region but occurring in other parts of the state (such as Carolina bay rims and aeolian or beach ridge deposits in the outer Coastal Plain) are considered part of the Coastal Plain Province.

C-Coastal Plain: All parts of North Carolina east of the Fall Line but excluding the Sandhills region and Tidewater. Generally consisting of unconsolidated sands, silts, clays, and peats, though rarely shallowly underlain by consolidated coquina limestone ("marl").

T-Tidewater: Areas associated with tidal water, such as the ocean and barrier islands, sounds, estuaries, and mainland brackish or salt marshes.

County – A listing of the known counties of occurrence in the NCNHP inventory is provided for each taxon. County name may be followed by an asterisk (defined below). The counties listed reflect data currently in the NCNHP database. We request information about any new occurrences in the state. If you would like to provide data and information to contribute to our database and broaden our understanding or the rare flora of North Carolina, please complete a NCNHP Plant Survey Form.

* All recorded occurrences in the county are either obscure, of questionable validity, extirpated, have not been found in recent surveys, or have not been surveyed recently enough to be confident they are still present. Occurrences are regarded as historical after they have not been surveyed for 20-40 years (the number of years depending on the species and the amount of habitat alteration in the area). An asterisk should not be regarded as a definitive statement that the species is gone from the county but indicates that its continued existence is uncertain.

The botanical exploration of North Carolina is far from complete, and many additional county records will be found, generally (but not always) in proximity to counties listed. Most species that do not have county of occurrence information are new to the Rare List and county status information had not been compiled at the time of publication. Visit the North Carolina Natural Heritage Program Species/Community Search page for the most up-to- date county occurrence information.

Frullania appalachiana	A Liverwort	SR-L		S1?	G3G4
Frullania donnellii	A Liverwort	SR-T		SH	G3?
Frullania oakesiana	A Liverwort	W-PK		SH	G5
Frullania plana	A Liverwort	W-PK		S1	G4
Frullania rappii	a liverwort	W-PK		S1?	GNR
Fuscocephaloziopsis connivens var. bifida	A Liverwort	SR-T		S1	G5T1Q
Fuscocephaloziopsis macrostachya ssp. aust	A Liverwort	W-QT		SU	G4T1
Fuscocephaloziopsis pleniceps var. caroliniar	A Liverwort	SR-L		SH	G5TH
Fuscocephaloziopsis pleniceps var. pleniceps	A Liverwort	SR-D		SH	G5T5
Heterogemma capitata	A Liverwort	W-PK		S1	G4
Lejeunea bermudiana	A Liverwort	SR-P		S1	G3G4
Lejeunea blomquistii	A Liverwort	SR-L		S1	G3
Lejeunea cavifolia	A Liverwort	SR-P		S1	G5
Lejeunea glaucescens var. acrogyna	Raven Rock Liverwort	SR-L		SH	G5TH
Leptoscyphus cuneifolius	A Liverwort	SR-D		S2	G4G5T4T5
Lophocolea appalachiana	A Liverwort	SC-V		S1	G2
Lophocolea muricata	A Liverwort	SR-D		S1	G5
Lopholejeunea nigricans	A Liverwort	SR-D		SH	G4G5
Lophoziopsis excisa	A Liverwort	SR-D		S1	G5
Mannia californica	A Liverwort	SR-T		S1	G3?
Mannia triandra	A Liverwort	W-PK		S1	G3G4
Marsupella emarginata ssp. emarginata	A Liverwort	W-QT		SU	G5T5
Marsupella funckii	A Liverwort	SR-D		S1	G4G5
Mesoptychia heterocolpos	A Liverwort	SR-D		S1	G5
Metzgeria consanguinea	A Liverwort	SR-D		S1S2	G4
Metzgeria pubescens	A Liverwort	W-PK		SH	G5
Metzgeria setigera	A Liverwort	W-PK		SH	G1
Metzgeria uncigera	A Liverwort	W-PK		S1	G3
Metzgeria violacea	A Liverwort	SR-D		S1S2	G4
Microlejeunea epiphylla	A Liverwort	SR-L		S1	G2G3
Mylia taylorii	A Liverwort	SR-D		S1	G5
Nardia scalaris ssp. botryoidea	A Liverwort	SR-O		S1	G5T1
Nardia scalaris ssp. scalaris	A Liverwort	SR-D		S1	G5T5
Neoorthocaulis attenuatus	A Liverwort	W-PK		S2	G5
Pellia appalachiana	A Liverwort	W-PK		S1	G4
Plagiochasma intermedium	A Liverwort	SR-O		S1	G3G5
Plagiochasma wrightii	A Liverwort	SR-D		S1	G3?
Plagiochila austinii	A Liverwort	SR-T		S1S2	G3
Plagiochila caduciloba	A Liverwort	W-RS		S3	G3
Plagiochila echinata	A Liverwort	SR-L		S1	G3
Plagiochila exigua	A Liverwort	SR-D		S2	G4?
Plagiochila miradorensis	A Liverwort	SR-P		SH	G4
Plagiochila patula	A Liverwort	SR-P		S1	G4G5
Plagiochila raddiana	A Liverwort	SR-P		S1	G5
Plagiochila retrorsa	Retrorse Leafy Liverwort	W-RS		S3	G4
Plagiochila sullivantii	A Liverwort	SR-T		S2	G3G4
Plagiochila undata	A Liverwort	W-PK		S2	G4G5

SCIENTIFIC NAME	COMMON NAME	STATE STATUS	FEDERAL STATUS	STATE RANK	GLOBAL RANK
Liverworts					
Plagiochila virginica var. caroliniana	A Liverwort	SR-T		S1	G4T4
Plagiochila virginica var. virginica	A Liverwort	SR-L		S1	G4T3
Porella wataugensis	A Liverwort	SR-L		S1	G2G3Q
Ptilidium ciliare	A Liverwort	SR-D		S1	G5
Ptilidium pulcherrimum	A Liverwort	W-PK		S1	G5
Radula sullivantii	A Liverwort	W-RS		S3	G3

Culatta, K.E and M.B. East. 2026. Natural Heritage Program List of the Rare Plant Species of North Carolina, 2026. North Carolina Natural Heritage Program, N.C. Department of Natural and Cultural Resources, Raleigh, NC. www.ncnhp.org

PLANT TAXA ENDEMIC TO NORTH CAROLINA

This is a list of all taxa (including subspecies) considered to be strictly endemic to North Carolina. The list does not include taxa whose range barely extends into another state, such as taxa endemic to the Roan Mountain area or Great Smoky Mountains National Park.

SCIENTIFIC NAME	COMMON NAME	N.C. STATUS	U.S STATUS	N.C. RANK	GLOBAL RANK
Acanthothecis fontana	Fontana Lichen	W-PK	N/A	S1	G1
Allium keeverae	Keever's Onion	SR-T	N/A	S1S2	G2
Allium sp. 1	Savanna Onion	SR-L	N/A	S1S2	G1G2
Coreopsis aristulata	Short-awned Coreopsis	T	N/A	S1	G1
Fellhanera eriniae	Erin's Fellhanera	W-PK	N/A	S1	G1
Fellhanera montesfumosi	Smoky Mountain Crustose Lichen	W-PK	N/A	S1	G1
Gaylussacia orocola	Appalachian Dwarf Huckleberry	E	N/A	S1	G1
Gentiana latidens	Balsam Mountain Gentian	T	N/A	S1	G1G2
Heuchera parviflora var. *saurensis*	Sauratown Grotto Alumroot	SC-V	N/A	S1	G4T1
Hexastylis rosei	Rose's Heartleaf	SC-V	N/A	S1	G1
Hexastylis sp. 1	Buck Creek Heartleaf	W-PK	N/A	S1?	GNR
Hudsonia montana	Mountain Golden-heather	T	T	S1	G1
Hypericum radfordiorum	Radford's St. John's-wort	SC-V	N/A	S1S2	G2
Hypericum sp. 2	LeBlond's St. John's-wort	SR-L	N/A	S1S2	G2
Isoetes microvela	Thin-wall Quillwort	T	N/A	S1	G1
Lejeunea glaucescens var. *acrogyna*	Raven Rock Liverwort	SR-L	N/A	SH	G5TH
Liatris helleri	Heller's Blazing-star	T	T	S2	G2Q
Marshallia grandiflora	Large-flowered Barbara's Buttons	SR-H	N/A	SX	GX
Narthecium montanum	Appalachian Yellow Asphodel	SC-H	N/A	SX	GX
Orbexilum macrophyllum	Bigleaf Scurfpea	SC-H	N/A	SX	GX
Packera serpenticola	Buck Creek Ragwort	T	N/A	S1	G1
Rhododendron vaseyi	Pink-shell Azalea	SR-L	N/A	S3	G3
Rhynchospora croatanensis	Croatan Beaksedge	W-PK	N/A	S1?	G1?
Shortia brevistyla	Northern Oconee Bells	E	N/A	S2	G2
Solidago plumosa	Yadkin River Goldenrod	T	N/A	S1	G1
Solidago villosicarpa	Coastal Goldenrod	E	N/A	S1S2	G2
Symphyotrichum rhiannon	Buck Creek Aster	T	N/A	S1	G1

RARE PLANT LIST CHANGES 12/15/2025-12/15/2026

North Carolina Natural Heritage Program
Katherine Culatta, Botanist
Mitch East, Data Manager

Rare Plant List Changes[1] over the Time Period 12/15/2024 - 12/15/2026

(changes are shown for tracked taxa only)

Element name	Change type	Initial value	Final value
Vascular Plants			
Agalinis virgata	State status	T	SC-V
Agastache nepetoides	S rank	S1	S2
	State status	SR-P	T
Agrostis mertensii	State status	E	SC-H
Allium allegheniense	S rank	S1	S2
	State status	SC-V	SR-T
Allium keeverae	State status	SC-V	SR-T
Andropogon perangustatus	G rank	G5T4	G4
Andropogon virginicus var. decipiens	G rank	G5T4	G4
Anticlea glauca	G rank	G5T4T5	GNRT4T5
	State status	SR-P	E
Arabis patens	State status	SR-T	E
Asplenium bradleyi	State status	SR-P	T
Asplenium ruta-muraria var. lanceolum	Scientific name	*Asplenium ruta-muraria var. cryptolepis*	*Asplenium ruta-muraria var. lanceolum*
Bacopa innominata	S rank	SH	S1
Berberis canadensis	State status	SC-V	T
Betula cordifolia	State status	SC-V	T
Bidens trichosperma	G rank	G5?	G4
Borodinia burkii	State status	SR-P	W-QD
	Tracking status	Full tracking	Watch list
Bromus ciliatus	State status	SC-V	T
Buchnera americana	G rank	GNR	G4?
Calopogon multiflorus	G rank	G2G3	G3
Campanula intercedens	Scientific name	*Campanula rotundifolia*	*Campanula intercedens*
Cardamine dissecta	State status	SC-V	SR-P
Carex albursina	S rank	S2	S2S3
	State status	W-PK	W-RS
Carex aquatilis var. substricta	State status	SR-P	T
Carex argyrantha	G rank	G5	G5?
Carex barrattii	State status	SC-H	T
Carex brevior	S rank	N/A (record created after date)	S2?
	State status	N/A (record created after date)	W-PK
	Tracking status	Not tracked	Watch list
Carex bromoides ssp. montana	G rank	G5T3?	G5T3
Carex eburnea	S rank	S1	SH
	State status	T	SC-H
Carex emoryi	S rank	N/A (record created after date)	S1
	State status	N/A (record created after date)	W-PK

	Tracking status	Not tracked	Full tracking
Nabalus crepidineus	S rank	N/A (record created after date)	S1?
	State status	N/A (record created after date)	SR-P
	Tracking status	Not tracked	Full tracking
Nelumbo lutea	State status	W-PK	W-RS
Nymphoides cordata	S rank	S2	S2S3
	State status	W-PK	W-RS
Oenothera unguiculata	State status	SR-T	T
Orthochilus ecristatus	S rank	S1	SH
	State status	E	SC-H
Packera schweinitziana	State status	T	E
Palustricodon aparinoides	Scientific name	*Palustricodon aparinoides var. aparinoides*	*Palustricodon aparinoides*
Parnassia grandifolia	G rank	G3	G3G4
Paxistima canbyi	Tracking status	Watch list	Not tracked
Persicaria robustior	G rank	G4G5	G5
Phaseolus sinuatus	G rank	G5T3?	G3?
Phegopteris connectilis	State status	E	T
Piriqueta caroliniana	G rank	G5?TNR	GNR
Plantago cordata	G rank	G4	G3
Plantago sparsiflora	State status	T	E
Platanthera flava var. herbiola	Scientific name	*Platanthera herbiola*	*Platanthera flava var. herbiola*
Platanthera integra	State status	T	E
Platanthera nivea	State status	E	SC-H
Poa saltuensis	State status	T	SC-V
Polemonium reptans var. reptans	State status	T	SC-V
Polygala senega	Tracking status	Full tracking	Not tracked
Polygonella articulata	State status	SC-H	T
Polygonum aviculare ssp. buxiforme	G rank	G5	G5T5
	Scientific name	*Polygonum buxiforme*	*Polygonum aviculare ssp. buxiforme*
Prunus susquehanae	G rank	G5T4T5	G5T5
Ptilimnium costatum	G rank	GNR	G4
Pycnanthemum virginianum	State status	SR-P	T
Quercus ilicifolia	State status	E	T
Ranunculus allegheniensis	State status	W-PK	W-RS
Rhexia aristosa	State status	SC-V	T
Rhodiola rosea ssp. roanensis	Scientific name	*Rhodiola rosea*	*Rhodiola rosea ssp. roanensis*

[1] changes in global and state rank values, protection status (federal and state), scientific name, and tracking status

Rare Plant List Changes[1] over the Time Period 12/15/2024 - 12/15/2026

(changes are shown for tracked taxa only)

Element name	Change type	Initial value	Final value
Rhododendron smokianum	State status	SR-T	SC-V
Rhynchospora alba	S rank	S2	S2S3
Rhynchospora cephalantha var. attenuata	G rank	G5T3?	G5T4
Rhynchospora croatanensis	Scientific name	*Rhynchospora sp. 2*	*Rhynchospora croatanensis*
Rhynchospora harperi	State status	SC-V	T
Rhynchospora macra	State status	T	E
Rhynchospora sulcata	State status	SR-P	T
Rosa virginiana ssp. virginiana	G rank	N/A (record created after date)	G5TNR
Rubus strigosus	State status	T	SR-P
Ruellia humilis	State status	T	E
Ruellia purshiana	State status	SC-V	SR-T
Scirpus flaccidifolius	State status	E	SC-H
Scleria reticularis	State status	SC-V	T
Scleria verticillata	State status	SR-P	T
Scutellaria saxatilis	State status	SR-T	SC-V
Senega appendiculata	S rank	N/A (record created after date)	S1
	State status	N/A (record created after date)	W-PK
	Tracking status	Not tracked	Watch list
Senega hookeri	Scientific name	*Polygala hookeri*	*Senega hookeri*
